Experience

i) Software Developer – S2Tech

Duration: May 2026 – Present

- Developing and maintaining web applications using PHP and CodeIgniter 4 (CI4).
- Working on various business modules, reports, and transaction management functionalities.
- Developing and modifying controllers, models, routes, and database queries.
- Implementing data filtering, sorting, searching, and pagination using DataTables.

- Designing and improving responsive user interfaces using HTML, CSS, Bootstrap, and JavaScript.
- Managing MySQL database operations and troubleshooting database-related issues.
- Debugging application errors and improving existing functionality, usability, and performance.
- Working on report generation, data presentation, and print-friendly layouts.

Tech Stack:

PHP, CodeIgniter 4, MySQL, JavaScript, jQuery, HTML, CSS, Bootstrap, DataTables.

ii) Full Stack Developer – Enats LLP

Duration: 7 Months

- Developed and maintained scalable web and mobile applications
- Contributed to **Djobzy mobile application** development using React Native
- Developed and enhanced **Djobzy web platform** using Laravel (PHP)
- Designed and integrated RESTful APIs for seamless frontend-backend communication
- Implemented authentication systems and core application functionalities
- Built responsive and user-friendly interfaces using HTML, CSS, Bootstrap, and JavaScript
- Managed and optimized database operations using MySQL (phpMyAdmin)
- Identified, debugged, and resolved technical issues to improve performance and usability

Tech Stack:

Frontend: React.js, JavaScript, HTML, CSS, Bootstrap

Backend: Laravel (PHP), Node.js

Database: MySQL

Tools: phpMyAdmin

Skills & abilities

- Quick learner with strong adaptability in dynamic environments
- Solid understanding of web development concepts and best practices
- Good communication and teamwork skills
- Ability to analyze problems and deliver efficient solutions

Technical Skills

Languages & Technologies: MERN Stack Developer | Full Stack Developer | HTML | CSS | JavaScript | PHP | React.js | React Native | Node.js | Laravel (PHP)

Database: SQL | Oracle | MongoDB | MySQL

Operating System: Windows

Project

Expense Tracker (MERN Stack)

- Developed a full-stack expense tracking application using MongoDB, Express, React, and Node.js
- Designed REST APIs to handle expense data operations (add, update, delete)
- Built dynamic and interactive UI for real-time data display

Task Manager

- Developed a task management system with secure user authentication
- Enabled users to create, update, and delete tasks efficiently
- Designed a clean and user-friendly interface for better usability

E-commerce Website (Candles Store)

- Built a complete e-commerce platform with user and admin functionalities
- Implemented product management, cart system, and order processing
- Integrated database for managing users, products, and transactions

Additional Technical Skills

Frontend: HTML, CSS, Bootstrap, JavaScript, React.js, React Native
Backend: PHP (Laravel), Node.js
Database: MySQL, MongoDB
Tools: Git, Postman, phpMyAdmin
